Know-how

Infrastructure as Code:
- *Terraform / OpenTofu*
- *AWS CDK / CloudFormation*

Cloud & Platforms:
- *AWS*
- *Kubernetes*
- *Docker*

DevSecOps & CI/CD:
- *GitHub Actions / GitLab CI*
- *Shell scripting*

Programming:
- *Python*
- *TypeScript*
- *Java, C++, PHP, Haskell (academic projects)*

Certifications

- *Supplement Diploma - ICT Solution Architect*
- *EUC Primer*

Soft Skills

- *Critical thinking*
- *Teamwork*
- *Creativity*
- *Transparency*

Languages

- *Italian: native*
- *English: professional working proficiency*
- *French: beginner*

Other interests

- *Chess*
- *Gym / Fitness*
- *Personal finance*
- *Volleyball*
- *Martial arts*

About Me

Over 5 years of experience focused on the AWS ecosystem. Specialized in designing mission-critical infrastructures, Infrastructure as Code (Terraform/CDK) automation, and compliance (NIS2, ISO 27001). Proven ability to coordinate technical teams and optimize cloud costs (FinOps), combining a strong academic background with a pragmatic, business-oriented approach.

Work experience

AWS Specialist *Var Group - 2023 / Present (Fully remote)*

- ***Governance & Security:*** *design and modularization of enterprise AWS Landing Zones (ISO 27001 / NIS2). The implementation of automated guardrails resulted in an estimated 75% reduction in auditing time.*
- ***Platform Engineering:*** *technical leadership in the development of reusable Terraform/CDK modules; elimination of configuration errors and a 70% reduction in time-to-market through standardized end-to-end pipelines.*
- ***FinOps:*** *periodic assessments and architectural refactoring, achieving a proactive 20% reduction in wasteful cloud spending.*

Cloud Solution Architect *Storm Reply - 2021 / 2023 (Turin)*

- ***Cloud modernization:*** *technical lead in large-scale on-premises to cloud migration projects, optimizing scalability and resilience.*
- ***Data strategy:*** *implementation of data lake architectures and large-scale BI solutions for enterprise clients.*
- ***Modular IaC:*** *development of standardized libraries, significantly reducing handover time between Dev and Ops teams.*
- ***App development & automation:*** *development of cloud-native APIs and end-to-end lifecycle automation through advanced CI/CD pipelines.*
- ***End-user computing:*** *setup of VDI solutions (Amazon WorkSpaces & AppStream 2.0), ensuring GDPR compliance for access to sensitive data.*

Teaching assistant - Cloud & Green Computing *University of Pisa - 2021*

Teaching assistant for a Bachelor's degree course: mentoring students on cloud paradigms, distributed systems, and software energy efficiency.

Software Developer *(EU internship)* *University of Pisa - 2019*

Development of a Java-based simulator for the analysis of opportunistic social networks. Integration of real geospatial datasets to model user behavior in urban environments.

Hardware and Software Technician *(internship)* *Wire Studio - 2013*

Education

Master's Degree in Computer Science *University of Pisa, 110/110 - 2021:*

"Developing and validating a web shell for offensive security"
